## ADDITIONAL INFORMATION

From January 1st. 2024 we will be ready to provide possibility of the light source selection.

A choice between recent version of BiColor lamps and new BiColor combination as Daylight White / Chroma key green. Power consumption will be the same, when background intensity will be almost doubled.

For practical installation of the Asymmetric Background and Back Lighting kits please apply for master supervision by DWF personnel.

When all rigging arrangements are made according to our advise and studio ready for set-up one person will travel for 2 full days for installation supervision, further alignment, setting and tuning as well as user training. Supervisor cost will be 499,00 Euro per 8 hour day + taxes. Travel costs and accommodation should be carried on by the customer.

In case of our installation supervision we are happy to provide 5 years warranty for Asymmetric equipment.

New development of Asymmetric Gen4.0 series will obviously expand our product range, but recent generation will be under production and full support due to unique adjustment capability and efficiency. Possible upgrades of the lamps may be easily arranged within 5 minutes per lighthouse timeframe. None of special tools are required for this operation.

Small but very efficient update of reflector rotation axis holders fixation allows to perform position adjustment without tools! Please apply for free upgrade.
